New Individual Recovery Program and Family Group Sessions Available!

Help is Here.

A Renewed Mind will begin taking names to provide adolescent boys *Individual Recovery Program (IRP)*. Too often substance abuse is left untreated and can lead to not only health and overdose risks, but legal, relational, and school difficulties. We can help by quickly getting to the root of the problem and fostering positive change.

Because family support plays a vital role in developing and sustaining change, *Family Group Sessions* are provided bi-weekly as a component of IRP.

Call today for intake as space is limited in these groups!
